Election Returns. The election returns, which we publish this norning, are meagre and unsatisfactory. The Democrats have carried the county of Hamilton, Ohio, by a majority of 1,000. This is a gain on the last year's vote of about 2,000, and renders it possible that the Democrats may have carried the Legislature. The returns from Pennsylvania indicate an Opposition triumph.

FINE ARTS .- We would call the attention of our readers to the advertisement of Mr. C. C. Spencer of a large and choice collection of superb oil paintings, now on free exhibition at the new store house, Jefferson street, near Third, to be sold at auction on Thursday next. The catalogue embraces one hundred and fifty-two pictures -All are not of striking merit, as could hardly be expected in so large a number, but most of them re good-many are better, and some of them very superior, among which we would notice Evangeline," from Longfellow, a fine copy of Coles' "Voyage of Life," battle of Monmouth, N. , portrait of Robert Burns, full length portrait of Gen. Lafayette, the Mother's Dream and Believer's Vision, a choice pair of parlor paintings, the Landing of the Pilgrims at Plymouth Rock, a fine copy of the Madonna after Raphael, the Tired Chums, two well executed Fruit Pieces, and variety of landscapes from American scenery o numerous to mention. Take them altogether hey excel any offered for competition heretofore this city. They will remain on exhibition day and evening until the sale.

THEATER .- "The Hidden Hand" brought out nother immense audience last night. Its perormance was, if possible, better than on the preceeding evening. Everything moved off smoothy, the performers gathering inspiration from the lose attention and flattering applause of their nearers. The piece is decidedly the most popular one ever produced in Louisville, and it has not only attracted the regular theater-goers, but large numbers of those who rarely visit the establish.

As we stated yesterday, the main work of the Miss Joev, Mr. Lorton and Mr. Rvan, as far, howver, as the minor ones go, they render their parts dmirably. Mr. Elmore's Black Donald is done n his usual thorough manner. He never forgets he minute detail of a character, and always with the finest touches brings the most striking points directly before the spectator. Mrs. Elmore's character of Mrs. Condiment is also a very careful iece of acting. Miss Adelaide renders her part with her accustomed sweetness. Miss Cook, Mr. Hamilton, Mr. Howland and others fill their parts

fully embossed with initials. Mr. Clarke has procured a superior French empossing press, with a great variety of initial dies of large and small letters, so that he is enabled to emboss any lady's or gentleman's initials upon their note paper and envelops at the shortest no-

tice. This style of paper for correspondence has become quite fashionable, and all who desire to be a la mode should not fail to avail themselves of the opportunity thus offered. Call at Mr. Clarke's store, under Mozart Hall, and see his specimens. Re-Arrested .- Wm. Huff, who was lately in

custody for an alleged burglary, and released on bail, is again in jail. Yesterday morning he gave bail in the Criminal Court to answer any charge that might be preferred against him, on October 17th, in that Court; and as he was leaving was again arrested. FIRST HEAT. The prancing and plunging of the high-mettled acers caused a slight delay; but at last they got a pretty fair send off for that number of entries Warfield had the inside, and his orange color showed in advance to the middle of the back stretch, Clay second, Viley third, and the others close up, and all going like the devil was after them. At the half mile Clay went by Warfield, who also gave place to Viley and Ward's. Gilpatrick, on Zadie, at this point, made a push for position, but was outfooted and fell back. As they disappeared behind the trees, Clay led Viley a length, Warfield third. When they came in sight Clay was still in the lead, hotly pursued by Viley & Ward's, the other three within five lengths. They round the turn into the stretch Clay having the advantage, but the gallant Lexington creeping up on him. Down the stretch they come at a terrible pace, Clay still holding his own, and both under whip and spur; but within a hundred yards of the members' stand the Lexing. ngton colt makes a desperate brush, shows a head in advance, and his rider cleverly lands him winner by a neck. The "fielders" shout, and the knowing ones don't. Warfield was third, Atchison fourth, Zadie fifth, and Scruggs' Albion

THE SECOND HEAT. There wasn't much betting for this heat, the backers of the Lexington colt not pressing their luck, as they already had a good thing of it if he won, and the friends of the favorite had little chance to hedge; so they hoped on, but had great fears. The tap of the drum let them off-Warfield and Viley & Ward jumping for the lead, out the Lexington was too fleet, and on the first ourn showed a full length ahead. On the back stretch the Lexington led the van, the pace being very fast-Warfield second and Clay third. PARODI OPERA TROUPE AT MOZART HALL THIS EVENING .- All lovers of excellent music will be delighted to see the announcement that the opera o be performed this evening is Perdi's sublime and magnificent opera "Ernani," which was received with unbounded enthusiasm at the first representation in this city a few weeks ago by the above celebrated Opera Company "numbering

ifty great artists.' The principal character will be sustained by Signora T. Parodi, of whom it is unnecessary t say anything to those who listened to her on he recent appearance here in her thrilling impersonstions. Those who had the misfortune not t hear this great Artist should not loose this favor able opportunity.

Sig. Sbriglia, the handsome young tenor, will appear as "Ernanz," in which character he excels. He possesses a rich, fine, and well cultivated voice, "superior to the generality of tenors in this country."

Sig. F. Gnone, the celebrated Baratone, will also appear and delight the audience, as in his recent appearance in this city. Of Sig. Gnone it s needless to speak. We have but one opinion, 'and that of being a superb artist."

Sig. N. Barile, the famous Bass, will take the part of Silva, in which character we may proounce him perfect. The company, as a whole, are all that has been represented, and we do not know of an exception

to the general praise that must be bestowed upon them. The chorus and orchestra is, without doubt, the very best that we have ever heard in this or any other city. Under the entire direction of the celebrated conductor, Sig. Angelo Touriani. The demand for seats yesterday was great, and

here is every prospect of one of the largest and nost fashionable audiences ever witnessed in this city. Secure your seats in time this morning, or you will have no chance to-night. The Mozart Hall will be fitted up for these grand operation representations, and no expense will be spared to make the above operatic performances far sur pass any previous representation.

We are told that "Polinto," Donizetti's grand opera, will be produced by the troupe during their short stay here, of which due notice will be given. Remember the opera this evening at 8 o'clock, at Mozart Hall. Tickets may be secured this morning at D. P. Fauld's music store, and at the Hall

COME AT ONCE, DO NOT PUT IT OFF. - Many in the city have expressed a desire to learn the different styles of painting taught by us at Webster & Bro's., Main street. To such and to all others that may be interested, we wish to say that we shall positively discontinue our teaching in this city after the twenty first of the month. MR. & MRS. G. S. LACEY.

CAPT. M'CLIINTOCK'S REPORT.

The telegraph briefly advised us that Captain

McClintock, of the British Navy, had returned

from the Arctic regions, with tidings of the fate

of the lost navigator, Sir John Franklin. From

his letter to the Admiralty we make extracts. In

Their Lordships will rejoice to hear that our en

deavors to ascertain the fate of the "Franklin Ex-pedition" have met with complete success. At Point Victory, upon the northwest coast of King William's Island, a record has been found,

his letter he says:

shap deeply interesting relics of our lost countrymen have been picked up upon the western shore of King William's Island, and others obtained from the Esquimaux, by whom we were informed that subsequent to their abandonment one ship was crushed and sunk by the ice, and the other forced on shore, where she has ever since been, affording them an almost inexhaustible mine of wealth. ble mine of wealth.

The report furnishes an account of his exploraions, which were unsuccessful until intelligence respecting the fate of Sir John Franklin and his nen was met with on King William's Island -From this point his narrative is thus detailed: Early spring journeys were commenced on the 17th of Feb, 1859, by Capt. Young and myself, Capt. Young carrying his depot across to Prince of Wales' Land, while I went southward, towards the magnetic role in the horse of the second se

We had with us two sledges, drawn by dogs.—
On the 25th of February, when near Cape Victoria, we had the good fortune to meet a small

party of natives, and were subsequently visited by about 45 individuals. For four days we remained in communicatio with them, obtaining many relics, and the infor-mation that several years ago a ship was crush-ed by the ice off the north shore, off King Wil-liam's Island, but that all her people landed safe-ly, and went away to the Great Fish River, where ey died. This tribe was well supplied with wood

We reached our vessel after 25 days' absence, we reached our vessel after 20 days absence, is good health, but somewhat reduced by sharp marching and the unusually severe weather to which we had been exposed. For several days after starting, the mercury continued frozen.

not the case. Only one family were met off Point Booth, and none at Montreal Island or any place island were searched without finding anything except a few scraps of copper and iron in an

squimaux hiding place. Recrossing the Strait to King William's Island. we continued the examination of the southern shore without success until the 24th of May, when bout ten miles eastward of Cape Herschell, a leached skeleton was found, around which lay ragments of European clothing. Upon carefully emoving the snow a small pocket-book was ound, containing a few letters. These, although nuch decayed, may yet be deciphered. Judging from the remains of his dress, this unfortunate oung man was a steward or officer's servant, and is position exactly verified the Esquimaux's as-ertion, that they dropped as they walked along On reaching Cape Herschell next day, he ex-mined Simpson's Cairn, or rather what remains t it, which is only four feet high, and the central stones have been removed, as if by men seeking comething in it. My impression at the time, and which I still retain is, that records were deposited there by the retreating crews, and subsequently removed by the natives.

After parting from me at Cape Victoria on the 28th of April, Lieut. Hobson made for Cape Fe-28th of April, Lieut. Hobson made for Cape Felix. At a short distance westward of it he found a very large cairn, and close to it three small tents, with blankets, old clothes, and other relics of a shooting or a magnetic station; but although the cairn was dug under, and a trench dug all round tat a distance of 10 feet, no record was discovered. The Erebus and Terror spent their first winter at Beechy Island, after having ascended Wellington Channel to lat. 72 deg. N., and returned by the west side of Cornwallis Island. On the 22d of April, 1848, the ships were abandoned five leagues to the N.N.W. of Point Victory, and the survivors, 105 in number, landed here under the command o Capt Crozier. This paper was dated April 25, 1848, and upon the following day they intended to start for the Great Fish River. The total loss by deaths in the expedition up to this date was nutficers and fifteen men. A vast quantity clothing and stores of all sorts lay strewed abo as if here every article was thrown away which could possibly be dispensed with: pickaxes, sho els, boats, cooking utensils, iron work, rope, blocks, canvas, a dip circle, a sextant engraved "Frederic Hornby, R. LAUNCH OF THE U. S. STEAMER PAWNEE .- The ine steamer Pawnee, which was on the stocks at the Philadelphia navy yard at the time of the visit to that place of the Uncinnati Council, was launched on Saturday. She is one of the most unique yet symmetrical vessels ever built at this navy yard. Her model being of the clipper type above water, and at the how and stern lends to with heavy and impenetrable packed ice.

When in lat. 69° 09' N, and lon. 99° 27' W., we came to a large boat, discovered by Lieut. Hobson a few days previously, as his notice informed me. It appears that this boat had been intended for the ascent of the Fish river, but was abandoned appearently upon a return journey to the ships, the sledge upon which she was mounted being pointed in that direction. She measured 28 feet in length by 7½ feet wide, was most carefully fitted, and made as light as possible, but the sledge was of solid oak, and almost a heavy yard. Her model being of the clipper type above water, and at the bow and stern tends to deceive the casual observer as to the real size of deceive the casual observer as to the real size of the vessel, and it is on y by examining her midship body that her great capacity and floatative power is seen. The chief object in view in the construction of this vessel, is light draught of water combined with great speed, which cannot be obtained without corresponding strength—an important quality which has not been lost sight of, as the mode of construction, when examined, will abundantly prove.

One barrel in each was l'oaded and cocked; there Editors Louisville Courier: GENTLEMEN, -No facstreet to oppose the construction of a railroad on that street. They know by the sure and costly lessons of experience, commencing in 1838 and extending through several years, that a railroad was ammunition in abund ance, also thirty pounds or forty pounds of chocolate, some tea and tobacco. Fuel was not wanting; a drift tree lay within one car propelled by horse power, running from Sixth street to Portland, stopped all improvement below Sixth. An old fogy aspect covered all the line of Many very interesting relics were brought away by Lieutenant Hobson, and some few by myself. On the 5th of June I reached Point Victory with-out having found anything further. The clothing, &c., was again examined for documents, note-books, &c., without success, a record placed in the were removed from the street, and as it was hoped, forever, that buildings of a superior class took the place of the old, dilapidated houses below Sixth street. As late as the year 1846, standing on the colonade of the Louisville Hotel, the stran-ger's eye could not but light on an old cost just cairn, and another buried 10 feet true north of it. Nothing worthy of remark occurred upon my eturn to the ship, which we reached on the 19th return to the ship, which we reached on the 19th of June, five days after Lieut. Fobson.

The shore of King William Island, between its north and west extremes, Capes Felix and Crozier has not been visited by Esquimaxx since the abandonment of the Erebus and Terror, as the cairns and articles lying strewed about, which are in their eyes of priceless value, remain un touched. If the wreck still remains visible, it is probable she lies upon some of the off lying islets to the southward, between Capes Crozier and Herschell.

From all that can be gleaned from the record paper and the evidence afforded by the boat, and up Main street, which hung in front of a frame cross the street, which hung in front of a frame building, with the sign, "dyeing and securing." While, during the same time, business extended from Sixth street up Main to Second, there was not a business house worthy of the name erected bad been removed. The owners of property cannot forget these lessons. Twenty-three years ago the intersection of Sixth and Main streets was enthusiastically, perhaps, called the center of business. Whoever stands there to day, and looks upon the record paper and the evidence afforded by the boat, and

onthward, between Capes Crozier and Herschell. From all that can be gleaned from the record paper and the evidence afforded by the boat, and rarious articles of clothing and equipment discovered, it appears that the abandonment of the Electure and Terror had been deliberately arranged, and every effort exerted during the third winter to render the traveling equipments complete. up Main street, will see what prosperity came above Sixth street, where no borse car was feared, and he has only to look down Main street to see and he has only to look down Main street to see the blight of adversity which attended the property adjacent to that railroad.

It is in vain to quote the examples of other cities in reference to a Main street road. No city was ever built up by street railroads. They have only been resorted to under the pressure of necessity. No city, with only one beautiful business street, has commenced the experiment of railrender the traveling equipments complete.

It is much to be apprehended that disease had greatly reduced the strength of all on board, far more perhaps than they themselves were aware The distance by sledge route, from the position sity. No city, with only one beautiful business street, has commenced the experiment of railroads on that one street. It may be proper to remind the reader that mea who signed the remenstrance against the Main street road are not opposed to any other road. They are not old fogies, but they are men who have built magnificent stores, dwellings, factories, and hotels—who have stores, dwellings, factories, and hotels—who have of the ships when abandoned, to the boat is 65 geographical miles; and from the ship to Montreal sland 220 miles. The most perfect order seems to have existed stores, dwellings, factories, and noters—who have invested their funds in the bonds of the Nashville road and of the Water Works. They are men whose labors to build up the city, and whose sub-stantial structures, will last and be remembered

when they themselves are in their graves.

The discussion of this question has, probably ere this, satisfied every man of business that the whole system of street railroads is too new and untried to be understood in its permanent effects on the streets where the roads have been located. The judgment of the wisest men in all reserved. G." APr. 134. It appears that the fore part of the stem had been cut away, probably to reduce weight, and part of the letters The judgment of the wisest men in air parts of our land is against a headlong precipitation of such a question on the public mind. The newspapers inform us that legal proceedings have been instituted by citizens of Cincinnati against the instituted by citizens of Cincinnati against the road on Sycamore atreet, and the Court ordered the removal of one of the tracas from that street. The intense aversion with which property owners regard the Main street road is a most laudable feeling, because the permanent prosperity of the nercoants and proprietors on Main street is the sole object of the opposition to that road. The prosperity of this street will be felt in every street of the city, and in every business, manufacturing

smooting boots, a pair of very heavy iron-shod knee boots, carpet boots and shoes—in all seven or eight pair, two rolls of sheat lead, elm tingles for repairing the boats, nails of various sizes for coat, and sledge irons, three small axes, a broken saw, leather cover of a extent case, a chain-cable punch, sik handkerchief (black white and cable) as well as commercial. A street railroad may cause a mushroom growth on vacant lots, but it will be dwarfish and secondrate; or it may build up and establish a retail trade. It is totally incompatible with a business requiring heavy loads to be moved on two horse rays, the dray alone being twenty-five feet long, and the two or four-norse wayons twice that length, in a street fitty-six feet wide from ours to curb, with a railroad car running in the center of

Remarks upon these Articles .-- The spear staff neasures 6 teet 3 inches in length, and appears o have been part of a light boat's sail; it meas No horse car can ever descend from the hills nto this quarter of that city. The railroad on her Fourth street may be a benefit, because that treet is occupied by retail stores and dwellings, and not by the kind of trade now on our Main st. The location of the railroads in St. Louis is be-ond the wholesale trade, on Fourth street, and between and lashed on to the staff. The rivers are of copper nails. The native who sold it said be himself got it from the boat in the Fish river. Another spear of the same kind was seen. The ers have run on inferior streets, doing a retail trade or occupied by dwellings of a second or third class. The case does not resemble ours in any of these cities, which have a population of rom a quarter of a million to a million of inhab-tants. The inconvenience of driving any one rade from any of their streets would not be pereptible in the ace of an annual increase of pop-lation by tens of thousands. How different the asse with us! Twelve months ago many stores on Asin street were vacant, and remained vacant for many months, and during the present year but our stores have been erected from First to Eighth ross streets. These facts show clearly that Main profitable trade than is now done there. They how that the present trade of that street cannot the ship was driven ashore by the ice, and where the white people had thrown it away; it was be lost without a serious depreciation in the value

property thereon.

Main street is the only thoroughfare for all the rade and travel from the Indiana railroads-their It is the only thoroughfare of the city, for all the trade and travel from the river above the falls to ferred to Water street, which is only seven squares long. It cannot be done on Market street, which is now fully occupied by Marketouses and wagons, while no vehicles will goon lefferson street, through dread of the loc

and its business and travel and prosperity will leave it, and nothing be gained, except the notoriety of attempting to follow the course of other sites, whose age, extended and firmly established commerce, and large manufacturing population, makes that a necessity for them, which with us, is only a wild foolishness.

It has been said that a railroad is requisite to carry laborers from one end of the city to the other, at low rates of fare. If this were true, there would certainly be some evidence of the fac; as, for example, vast numbers going up and down Main, to their daily labor, morning and evening. Where are these vast numbers of laborers, and where is their work? At present, we are told that dive or six omnibuses do all this business, and are not half the time full. The railroad on Jefferson street could carry ten times the number, for whose convenience so many anxious thoughts now press upon public attention. A car on that street and would not be subject to such detentions as would be experienced passing through Main arrest. It would more than accommodate all, and be more accessible to the majority of the people, being nearer their dwellings, than a road ou Main street, while the trip to Portland would probably be made in less time on Jefferson than on Main street. The question of introduction and whether the The question of jurisdiction, and whether the Legislature is not prohibited by the acts of the State of Virginia, may be of importance to all who desire to engage in such enterprises.

The seller would be seller that it would not answer to the south. The seller would be so that the control of the south of t The more desperate the political fortunes of party on the Lecompton question. But notwithstanding Judge Douglas is every day becoming more weak, his friends are attempting to bolster up his prospects by striving to produce the impression that he is rapidly gaining strength in both the North and South. Whilst we confess we can observe no evidences of the increasing popularity of Judge Douglas, at the same time we see innumerable evidences of his waning strength. So far from being more popular than he has heretofore been, the very reverse is the fact. He will obtain in the National Convention the vote of no Southern State, and it is extremely doubtful whether he can obtain a majority even of the Northern States. We think it may be safely assumed that New York, Pennsylvania, Indiana, California, and Oregon, will send to Charleston united anti-Douglas delegations. The delegations from other Northern States will be divided, and Judge Douglas could scarcely be nominated even though the nomination for the Presidency depended alone upon the votes of the Northern States in the National Convention.

And each day the prospects for Douglas are becoming more and more desperate. The recent result in California was a distinct repudiation of the especial friends of Douglas in that State. It is well known that Senator Broderick was instructed by the California Legislature to vote for the admission of Kansas with the Lecompton Constitution, that he declined to obey the instructions, and appealed to the people of California to sustain him in his course. The issue of Lecompton and anti Lecompton was distinctly made, and the Lecomptonites triumphed.

But even though nominated, Judge Douglas could not possibly be elected to the Presidency .-He could not obtain the electoral vote of a single Southern State, and it is by no means certain that he could obtain the vote of any Northern State. Those who think that Squatter Sovereignty will break down party lines in the North are vastly mistaken. In Maine the Democrats made the race on a Squatter Sovereignty platform, and were defeated by a much larger majority than they were last year. If the advocacy of Squatter Sovereignty did not add to the strength of the Democratic party in Maine, but, on the contrary, diminished it, what assurance have we that it will be a sufficiently potential dogma next year to insure the success of our party?

The boasted strength of Judge Douglas in the North and South has no real existence. He would make the poorest race of any candidate spoken of for the Presidency. To nominate him at Charleston would not only be to reward a disorganizer but would also insure inevitable defeat to the Dem

Sound Doctring Well Expressed .- The Dem ocratic Convention of the First Congressional district of Massachusetts, recently assembled to elect delegates to the Charleston Convention, took ocions on the subject of slavery in the Territories and said that they hold to the doctrine that the people of a Territory, when they come to exercise heir sovereignty in the formation of a State con stitution, have the right to mould the institution of the nascent State to suit themselves; but that 'the Territorial Legislature-the creature of Congress-cannot do what Congress cannot do-that either erect or abolish the institution of slave IV within the boundaries of the Territory."

This, says the Washington Constitution, is sound doctrine. This is the way that popular sovereignty was understood in the compromise measures of 1350, in the Kansas-Nebraska bill and in the Cincinnati platform. This was the way Mr. Buchanan understood it in his inaugura address; and this is the doctrine laid down by the Supreme Court of the United States.

It has been claimed that Senator Hunter of Virginia, was a political friend of Senato Douglas, and that he could overpower Henry A. Wise in that State, and return a delegation to Charleston, that would go for Douglas as second choice for the Presidency. The Richmond Examiner is the organ of Hunter, as the Enquirer is of Wise. A late number of the Examiner characterizes the Harper essay of Mr. Douglas as "pal pably unconstitutional heresy," and declares "that the South can NEVER be brought to indorse the doc trines arowed by Judge Douglas in his article in Harper's Magazine." "Here, then," says the Rich mond Enquirer, "is an end to Mr. Douglas in Vir

The steamer Fox, Capt. McClintock, sent ou by Lady Franklin, has returned to England, and has brought definite information as to the fate of Sir John Franklin and the men under his com mand. The sympathy of the civilized world has been for many years excited in behalf of Franklin and his men, and the full particulars of their trials and fate will be looked for with eager interest. The discovery of the fate of the expedition is mainly due to the noble and persistent efforts of Lady Franklin, whose exertions have been crowned with a melancholy success. A full record of the expedition, dated April 25th, 1848, was found at King William's Island, from which we learn that Franklin died June 11th, 1847, at the age of sixtyone years, having been born April 16th, 1786.

Numerous expeditions had previously been fit ted out both in this country and Great Britain to discover the lost navigators, and all had failed in their attempts. In 1848 Great Britain sent out three expeditions. The United States co-operated with Great Britain, and in 1850 the Grinnell expedition, under the command of Lieutenant De Haven, was sent out. Another expedition, under Dr. Kane, started in 1853; and the last one was sent out under Lieutenant Hartstein, and returned

"The story of Franklin's expedition can now be told, from beginning to end, somewhat as follows: May 86th, 1845-The Erebus and Terror sailed from Sheerness, officers and men numbering 138 persons.

July 26th, 1845-The expedition was seen in Baffin's Bay.

June 11th, 1847-Sir John Franklin died. April 22d, 1848-The Erebus and Terror were abandoned in the ice in Victoria Strait. Up to this time 33 of the officers and men had perished. Spring of 1850-About forty of the expedition were seen by Esquimaux on King William's

Summer of 1850-The bodies of the remnant of the crews were found near Great Fish river. There is nothing more to be told that is essen tial to ascertain the fates of the Erebus and Terror expedition. In five years from the time of their sailing all had perished."

EMPLOYMENT OF CAMELS IN THE UNITED STATES SERVICE.—A letter has recently been received by the Secretary of War from Supt. Beale, dated Fort Tejon, California, in which the writer speaks be derived from the employment of camels in the public service in the West. He states that he lately tried effectually the comparative value of mules and camels as pack animals, and the exper iment proved beyond all question the great supe riority of the camel, both as regards rate of speed he dreaded the difficulty which seemed to present themselves in breeding them; but his experience had satisfied him that they were as easily bred as cows and calves. He prefers them, for all such purposes that he has engaged them on, to three

times the same number of horses and mules. Tickets in the Shelby College and Havana-plan Lotteries for sale, or forwarded to any address. Prizes cashed. Office private.

Payment of Debts. Abolish all laws for the collection of debts, and leave creditors to their own power of discrimination. O'Hare, No. 427 Main street, is the old-leave creditors to their own power of discrimination. ting character when giving credit. This is the point to which our growing civilization tends, and to which practical wisdom and philosophy point. We have long since abolished the inhuman laws the have long since abolished the inhuman laws which used to imprison debtors, in which abolition we took the lead of old Europe. We have now wholesale department, while in the retail line he to lead the way to a more important reform. A great portion of the bad debts made arises from the pushing of business on imprudent buyers, ex-tending credits, and in relying on the law for enforcing payment. When without remedy at law, the seller of goods would look exclusively on the character—established character—wherever credit was given; and credits would be me re proportion-the collection of debts are very g ceat and absorb a large portion of the profit 1r cases of failures among the dealers, their debtors are, as it is well

many of those who were previously disposed to to tempt buyers too much. The seller would be more cautious. Besides, cash transactions would increase and speculative dealings diminish. The evasion of the present laws for the collection of debts is very easy to the dishonest man, aided by professional advice; and numerous instances bound of men having become rich, by running argely into deb', putting their property so juired out of reach, and setting all laws a nce. Rich men abound whose property is al settled on their wives, or held in trust for them by

GAMBLING IN WASHINGTON .- "Occasional," Wri ting about the game houses at the national capital, says:

A gentleman well acquainted with the secrets of these resorts, tells me that he has known as much as ten thousand dollars to be risked on a Main, with a new stock of fine watches, clocks, single game, and others have seen two or three thousand dollars hazarded on a single card, and in a single game. The nonchalance of the players is startling—they lose or win thousands without a sigh or a smile.

Faro, in which the better encounters the bank, s the prevailing game in these saloons, and although tables are set out, at which what is called "brag," "poker," and other games are played, the principal fascination is the platform, covered with green leather, behind which sits the imperturbable dealer with his pale face, black eve, and monotonous "call," while, on three sides, are cathered sitted. re gathered, sitting and standing, rank after ank, anxious and excited spectators, who, breathess with anxiety, watch the little cards as they are dealt from the tin box, and pick up their gains or swallow their losses, with a silence only interapted now and then by an angry exclamation or quiet chuckle of exultation. Night is turned nto morning, and the latter frequently surprises the contestants in a struggle. Occasionally a treak of luck befalls an outsider, which, like a orize in a lottery, becomes a sort of advertise-ment for the gambler. I do not pretend to say that there is fraud in these games, because it frequently happens that there is as much skill among he volunteers as there is in the principals of the stablishments, but those who have taken pains o investigate the facts do not hesitate to say that, unless on extraordinary occasions, the bank is sure to beat those who attempt to take up arms against it. So cautious have the keepers of these aces become that they are very careful as to whom they admit into their saloons, and it is to this caution that the public is indebted for the preservation of so many of those secrets which, f disclosed, would undoubtedly result in great

ARREST OF A FIFTH AVENUE GENTLEMAN FOR DE-RAUDING THE REVENUE.—U. S. Circuit Court.— Nelson, J —The United States against Jonathan K. Herrick,-The defendant, a wealthy residen f the Fifth avenue and a wholesale importer of ationery in John street, was recently arrested and held to bail in the sum of \$10,000 for receiv. ng goods through the Custom House at an under-raluation. It appears that information of the al eged fraud was given to the Federal officers, wh spatched Mr. Montgomery Gibbs to Europe to vestigate the transactions of the defendant.— On Mr. Gibbs' return, the invoices of Mr. Herrick. ge quantity, or underrated the value of the goods aported, and that goods to the amount of over 25,000 were thus passed at the Custom House. On Friday afternoon a motion was made to reuce the amount of bail.

Mr. Joseph Blunt appeared for the defendant, and stated that the informer against his client was ormerly a clerk in the employment of Mr. Her rick, and subsequently a partner; that this part ner, with another, actuated by malicious motives, sought to press this prosecution against Mr. Her rick. He also stated that Mr. Herrick had a suit pending against the informer and his companion for defrauding Mr. Herrick when they were in artnership together.
Mr. Charles H. Hunt, the Assistant District At-

orney, submitted the case on the affidavits, and emarked that Mr. Blunt had not shown any good eason in support of the motion.

The Judge considered that if the allegation ere sustained, the amount of duties to be recov ered would not exceed \$30,000, and he therefore reduced the bail to \$5,000, with two or more sure-ties to justify in double that sum.—N. Y. Express.

The fillibusters have lett New Orleans as is well known, but it has not been generally stated that just previous to their departure a duel alnost came off between two of their leaders. A orrespondent of the St. Louis Democrat says: Col. Thomas Henry, formerly of the United tates regular army, and more recently of Walker's Nicaragua army, challenged Col. Frank Anderson, the New York fillibuster officer, against shom he has cherished ill blood ever since the first expedition, and with whom he has frequent! ttempted to bring about an issue and settle the ffair. The latter showed more courage (and this quality has been proved in both men a hundred times.) than he would have by accepting the chalstatement that he had never injured Col. Henry to his knowledge, and if he had, never intended it, and that he felt no ill will toward Henry. So blood was spared.

A NEST OF COUNTERFEITERS BROKEN UP .- For a ng time there has existed in the village of Newurgh, on the Ohio, about thirty miles above his, a nest of counterfeiters, who have been soding the country with bogus coin, but who have managed the business so adroitly as to escape detection. The Deputy U. S. Marshal of the district has been watching the rascals a long while, and on Friday evening last, having made everything sure, made a descent upon a suspected house in the village and succeed in capturing some four or five of the leaders of the gang, among whom were Mr. Samuel Ligget, formerly a tavern keeper of Steubenville, and a Mr. Samuel Conn. In the house the officers found moulds, and all sorts of materials for carrying on the felonious business, together with about a cart load of ready cash all ready for circulation. Among the men arrested and immediately connected with the gang, is a patriarchal looking man about seventy years of age.— Wheeling (Va.) Intel.

The statement is going the rounds to-day that the Republicans and the Southern Americans have arrived at an arrangement for organizing the House without calling upon the anti Lecompton men for any assistance. The latter are no trusted. If this be true, it would not be surprising to see Winter Davis elected Speaker, should he be re-elected - Wash. Cor. Cin. Gaz.

The fishermen have a very curious way of catching fish in the Rhone. They wade into the water at night with a knife and a water tight lamp. They place the lamp under water, and the trout will soon follow it. As the fish come up to the surface of the water the fisherman kills them with his knife. This is no fish story, but a verita-

Vulcanite Base for Artificial Teeth has een thoroughly tested and used in Eastern cities for the last four years, and proved, beyond a doubt to be the best substitute ever used as a base for sets of teeth.

It possesses the following advantages over me talic plates: It is not more than half the weight of metal, is indestructible and perfectly cleanly .-The absolute certainty of fitting the mouth renders he old form of plate unnecessary, doing away with nore than half the width, getting a better fit, and ot at all impairing the taste, as is the case where the whole of the mouth is covered with a plate .-Its extreme lightness renders it particularly adapted to filling out sunken portions of the face. To hose who are wearing sets that they cannot eat with, we would say that if they will give us a trial we will guarantee them teeth with which they can eat and wear with ease and comfort. Established for the relief of the maguaded and imprudent votary of false pleasure, who, finding that he has imbibed theseeds of a certain loathsome disease, is, from an ill-timed sense of shame, determed from applying to a Physician, whose knowledge and esperience can alone befriend him in distress.

Being desirous of rendering Affections, in Epilepsy, in Pleurisy, in Sore Throats, and affections of the respiratory organs generally; in Dyspepsia, these wonderful Pills give immediate relief; nd perseverance will be sure to cure. Maladies which ave been pronounced beyond human skill have been ured by their use. And is this so wonderful? Behold he reason! Brandreth's Pills purify the blood; they ave no power, except over impure humors, and these eing removed, the disease is removed. Millions are being removed, the disease is removed. Millons are deriving health from the use of this innocent medicine, which never weakers, but always strengthen; firstly, by taking out of the body there matters, which held, as it were, the life principle in cuttody; and, secondly, by imparting a life giving property to the blood.

W. H. Settle Esq.: It gives me great ple sure to state that after a trial of one of the "Vesp r Gas Lamps" in my surly for six weeks past, and after observing closely for the same length of time the experiment of lighting our "Union Tent" with these lamps, I have entire confidenc in their efficiency. It seems to me that they afford all the advantages of the best gas lights to those who live out of the cities and large towns.

who live out of the cities and large towns.

The process of prepa ing and lighting the lamp is so readily learned, the fixtures are so simple and so little liable to get out of order, the cost of the light comparatively so little, and the whole so free from all danger,

that it needs only mere acquaintance on the part of the public with the Vesper Gas Lamp to bring them into general use throughout the courty.

Yours truly, SFUART ROBINSON.

thave used it in my country swelling house for several months past, and, af er a fair trial, I prefer it to any other mode of illumination that can be obtained outside of the gas limits of the city.

The construction of the "Vesper Gas" burner and retort is so perfectly simple that it cannot get out of order, nor can it explice.

The management of the burners is easily understood, and they require but little more attention to keep clean and in good order than ordinary gas fixures. The light produced by the "Vesper Gas" I consider fully equal in every respect to any other kind of gas light.

AT AUCTION. by more encouraging accounts from the The transactions in New York Central On FRIDAY AFTERNOON, October 14th, at half-east 8 o'c.ock, we will sell on the premises, south-east corner of Wentzel and Market streets, Four Building Lots, each 25 feet front by 105 deep. Also, four Building Lots on Market street, east of Wentzel, 25 feet from by 200 deep to a 20-foot alley.

Also, three desirable Lots on Ballard street.

West. The transactions in New York Central were not so large, as has been the case in recent periods of activity, the Western stocks, after the low prices lately established, attracting much attention. Central closed at 50½, which is a further advance on the transactions quoted in the printed list. Galena was the strongest of the Western list, touching 73½—a rise of 2 per cent. over yesterday's price. Illinois Central firm, and in demand at 68, with little cash stock offering.—Rock Island closed at 64¾, which is 1 per ct. better. Reading and Michigan Central were each ½ per cent. better. The State stocks were buoyant, especially Tennessee 6's, which rose 1½ per cent. These Lets were advertised for last Saturday afternoon, but on account of the inclemency of the weather, was postponed as above. Buyers will recollect that the sale will be positively sold.

American, French and English Wall Paper. MHIS is no cheap, chain single thread, ripping stitch Machine, but makes in every way the same TWO THREAD, DOUBLE LOCK, TIGHT STITCH, as the most popular high-priced Machines do. Its work will not rip through, though every third stich be cut. The principle is new, the Machine simple, easily adjusted, and not likely to get out of order. Sews from two common spools without rewinding. They will Stitch, Hom, Tuck and Gather—have less machinery than any other in use, every part of which is strong and durable. Its simplicity and strength particularly adapt it for plantation use. It sews the finest Muslin, heavy Negro Clothing, or Leather, by simply changing the needle and thread to suit the work.
